Rewrite the trigonometric expressions so that they are not in the fractional form

1. $\dfrac{1}{1-\sin x} + \dfrac{1}{1+\sin x}$	$2\sec^2 x$
2. $\dfrac{2}{\tan x + \sec x}$	$2(\sec x - \tan x)$
3. $\cot x - \dfrac{\csc^2 x}{\cot x}$	$-\tan x$
4. $\dfrac{\tan^2 x}{\csc x + 1}$	$\tan^4 x(\csc x - 1)$
5. $\dfrac{\sin x}{\tan x} + \dfrac{\cos x}{\cot x}$	$\sin x + \cos x$
6. $\dfrac{\tan x}{1+\sec x} + \dfrac{1+\sec x}{\tan x}$	$2\sec x \cot x$
7. $\dfrac{\sin^2 x}{\cos x + 1}$	$1 - \cos x$
